S/017/022 Project #36

5/17/022

Joelle,

**FYI and please place a copy in the mine file.**

Mr. Richard Clause (spl.?) called me from Florida this morning regarding his receipt of a delinquency notice for the above mentioned proposed placer project located in the Cresent Creek (Henry Mtn.) area. He has been out of the country (consulting) and just returned and stated he relinquished this state mineral lease at least 2 years ago and no work was ever performed on the site. Couldn't obtain necessary funding. Still believes there is good gold potential for the project area, but believes the very fine gold cannot be extracted using coventional placer mining methods. He felt latest upcoming "centrifical" jigging equipment may hold some promise for this type of deposit. I asked him to please "check the box", and attach a short note referencing our phone discussion and specifics of this situation. We will follow up accordingly.

Thank you!  
Wayne
